

Heat Pump Rebate

Central Electric
Membership Corporation

A Touchstone Energy® Cooperative

Rebate guidelines

Heat pump rebate is for installation on newly constructed homes as well as replacement on an existing home. Newly installed heat pump must have an efficiency level of **15 SEER or greater** to qualify.

A \$200 rebate per member is available. All guarantees on the quality and performance of the heat pump come from the manufacturer. Purchasing and selecting a dealer to install and provide future servicing is also the responsibility of the member.

Ensure your home meets the following standards:

- 01 Double or single pane storm windows.
- 02 Storm doors or insulated metal doors.
- 03 Attic ventilation that meets building code requirements.
- 04 Insulation with the following R-values:
 - Attic: R-38
 - Wall: R-15
 - Floor: R-19.
- 05 Ductwork installed in unconditioned area.
