

**CENTRAL ELECTRIC MEMBERSHIP CORPORATION
SANFORD, NORTH CAROLINA**

**PURCHASED POWER RIDER
RIDER PP**

Availability – This Rider is available on a voluntary basis in conjunction with any of the Cooperative’s Residential All-Electric Service, Small Commercial Service and Medium General Service rate schedules for a Consumer with a consumer-owned renewable generator connected on the load side of the Cooperative’s transformer serving the consumer’s facility. Under this Rider, the entire output of the consumer’s renewable generator shall be purchased by the Cooperative at the rate shown below and cannot be used to offset a portion of the consumer’s normal load requirements. The system must be less than 500 kW, meet UL 1741 standards, be in compliance with Section 690 of the NEC and IEEE 929, and operated in accordance with the rules of the Cooperative. The provisions of the Schedule with which this Rider is used are modified only as shown herein. Service rendered under this Rider shall be available in all territory served by the Cooperative only under written contract and is subject to the provisions of the Cooperative’s Service Rules and Regulations as approved by the Cooperative’s Board of Directors.

Type of Service – The type of service available under this Rider is single-phase, 60-cycles, 120/240 volts or three-phase, 60-cycles, 120/208 volts, 240/480 volts, 277/480 volts, or three-phase voltages other than the foregoing, subject to mutual agreement between the Cooperative and Member.

Monthly Rate – In addition to all other charges stated in the Monthly Rate of the Schedule with which this Rider is used, the following charges/credits shall also apply:

Administrative Charge: \$3.75 per month

Energy Charge:

Energy sold to the consumer shall be in compliance with the rate schedule under which the consumer is receiving service.

Purchased Power:

Power purchased from the consumer shall be at the rate of 5.25 cents (\$0.0525) per kWh and is subject to change based upon the Cooperative’s estimated avoided cost of wholesale purchased power.

Safety, Interconnection and Inspections Requirements – This Rider is only applicable for renewable generators that comply with the Cooperative’s interconnection requirements, along with the NEC, IEEE and UL requirements as stated in the availability clause of this Rider. In order to ensure protection of the Company’s system, the Cooperative reserves the right, at its discretion, to inspect the consumer’s renewable generator at any time upon reasonable notice to the consumer in an effort to ensure compliance with interconnection standards. The Cooperative reserves the right to disconnect electric service to any premises if the Cooperative determines that the renewable generator is not in compliance with interconnection standards or that there may be an unsafe condition that would present a danger to Cooperative employees or other consumers on the system.

The consumer must enter into a specific contract with the Cooperative prior to interconnecting with the Cooperative's system. Under the terms of the contract, the consumer shall be responsible for providing suitable control and protective devices on its equipment to assure that the Renewable Generator does not cause any disturbance to other consumers of the Cooperative or the Cooperative. Such control and protective devices shall also be designed to protect both the consumer's and Cooperative's facilities from all loss or damage that could result from the Renewable Generator operating in parallel with the Cooperative's system.

The consumer shall be responsible for any cost incurred by the Cooperative pursuant to the interconnection standards. The Cooperative reserves the right to require additional interconnection facilities, furnished, installed and maintained by the company, at the consumer's expense, if the consumer's renewable generator, despite compliance with the interconnection standards, causes safety, reliability or power quality problems.

The consumer shall obtain and retain, for as long as the consumer's generator is interconnected with the Cooperative's system, comprehensive general liability insurance that protects the consumer from claims for bodily injury and/or property damage. For a non-residential consumer the minimum coverage shall be comprehensive general liability insurance with coverage at least \$300,000 per occurrence and for a residential consumer the minimum coverage shall be at a standard homeowner's insurance policy with liability coverage of at least \$100,000 per occurrence. This insurance shall be primary for all purposes. The consumer shall provide certificates evidencing this coverage as required by the Cooperative. The Cooperative reserves the right to refuse to establish or continue the interconnection of the consumer's generator with the Cooperative's system, if such insurance is not in effect.

Metering Requirements – The Cooperative will furnish, install, own, and maintain metering to measure the kilowatt-hours delivered by the Cooperative to the consumer. The Cooperative will also furnish, install, own and maintain additional metering equipment to measure the kilowatt-hours delivered from the consumer to the Cooperative. The consumer shall be responsible for the cost of any meter bases, additional wiring, and county inspections required for the service that may be requested by the Cooperative. The Cooperative shall reserve the right to install and maintain access to special metering and load research devices on the consumer's equipment.

Contract Period – The Cooperative shall enter into a contract for a minimum original term of one (1) year and thereafter either party may terminate the contract by giving at least sixty (60) days notice of such termination in writing. The Cooperative reserves the right to offer a contract for a longer original term of years as specified with the individual contract with the consumer. The Cooperative further reserves the right to terminate the consumer's contract under this Rider at any time upon written notice to the consumer in the event that the consumer violates any of the terms or conditions of this Rider, or operates the renewable generator system in a manner which is detrimental to the Cooperative or any of its consumers. In the event of early termination of a contract under this Rider, the consumer will be required to pay the Cooperative for the cost due to such early cancellation.

Applicable Taxes – The total charges under the Rider will be increased by any applicable sales taxes imposed by any governmental authority.

Purchased Power Rider Contract

I, the consumer, have read and understand the Cooperative's Small Purchased Power Rider and agree to comply with the requirements therein.
